Skinny Bun

Features:

- 3" Flexible core and laminated skin design for rigidity and durability
- Ability to bend and flex when hit, versus other rigid core designs
- Guaranteed against delamination for 10 years from the date of delivery
- 50 mil UHMW Scuff Plate with 5 year warranty against wear
- Entire exterior is easy to clean. Rips and tears are repaired in minutes.
- Ergonomic and user friendly molded handles
- Flush mounted hardware prevents product damage.
- Available in multiple configurations to fit any application

Available Options

Fan Kit

As an alternative to a rear evaporator, the Two-Temp Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush motor life; displacement of 650 CFM; temperature range from -20° F to +80° F, and an On/Off switch.

Vent Kit

10" Diameter Vent with adjustable Velcro flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit.

Two-Way Hinge

Webbing reinforced on top and bottom, the Two-Way hinge allows entry from both compartments and prevents damage.

Cold Draw Ventilation System

As an alternative to a rear evaporator, the Cold Draw is mounted in the upper corner of the trailer. Air is drawn into the center of the compartment by a 12 volt motor and distributed across the ceiling, maintaining a constant temperature.

97-4505

Custom Labeling up to 3.75" High

Identify your bulkhead with your company name and trailer number.
