maintaining the integrity of **fresh**

Skinnny Bun Lite XP Insulated Bulkhead

Available Options

Fan Kit

As an alternative to a rear evaporator, the Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush motor life; displacement of 650 CFM; temperature range from -20° F to +80° F; and an On/Off switch.

Vent Kit

10" Diameter Vent with adjustable Velcro Flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit.

Cold Draw Ventilation System

As an alternative to a rear evaporator, the Cold Draw is mounted in the upper corner of the trailer. Air is drawn into the center of the compartment by a 12 volt motor and distributed across the ceiling, maintaining a constant temperature.

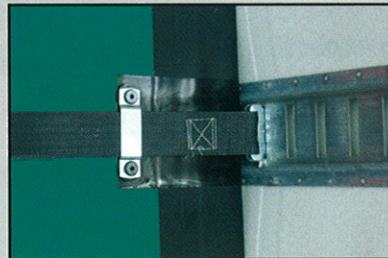

Custom Labeling up to 3.75" High

Identify your bulkhead with your company name and trailer number.

E or F Straps

Installed with flush mounted hardware and comes with a UHMW abrasion guard to protect against premature wear from the track.

Two-Way Hinge

Webbing reinforced on top and bottom, the two-way hinge allows entry from both compartments and prevents damage.
