 - *Durable high compression rated core*
 - *Exceptional resistance to moisture*
 - *Superior insulating efficiency*
 - *Molded ergonomic handles*
 - *Flush mounted hardware*

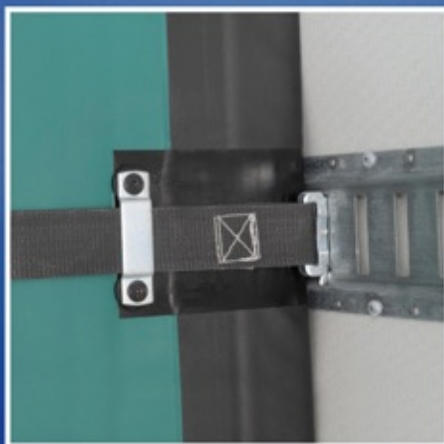

**Proven quality that has become synonymous
with ITW's Skinny Bun Product**

Available Options

Fan Kit

As an alternative to a rear evaporator, the Fan Kit allows temperature control in the second compartment. Specifications include: 10" diameter; 10 prong blade; 12 volt, 6000 hour brush motor life; displacement of 650 CFM; temperature range from -40°F to +80°F, and an On/Off switch.

E or F Straps

Installed with flush mounted hardware and comes with a UHMW abrasion guard to protect against premature wear from the track.

Vent Kit

10" Diameter Vent with adjustable Velcro flap provides controlled air flow to rear compartment or return air flow when installed with a Fan Kit

97-2010

Custom Labeling up to 4" high

Identify your bulkhead with your company name and trailer number.

Two-Way Hinge

Webbing reinforced on top and bottom, the Two-Way hinge allows entry from both compartments and prevents damage.

Cold Draw Ventilation System

As an alternative to a rear evaporator, the Cold Draw is mounted in the upper corner of the trailer. Air is drawn into the center of the compartment by a 12 volt motor and distributed across the ceiling, maintaining a constant temperature.
